Introduction to Intravenous Therapy for the Health Care Provider

Course Overview

This highly popular 16 hour IV Therapy Review is ready to begin at Roane State Community College/ Knoxville Campus. The course will serve RNs, LPNs, Medical Assistants or any other health care professional who needs training to start an IV and maintain the IV for administration of fluids. Our course will include theory and actual practice sessions.

Subjects covered include

- *IV therapy as a new skill or as a refresher course*
- *Anatomy and Physiology,*
- *identifying and selecting proper veins*
- *aseptic techniques, troubleshooting*
- *Indications and Contraindications of IV administration*
- *Calculate IV flow drip rates*

Our emphasis is on quality of care issues, employing scrupulous aseptic procedure to prevent infection and proper insertion technique to minimize patient discomfort. There will be numerous opportunities for hands-on practice. Join the thousands of health care professional that we have enabled to confidently and safely insert and maintain IV therapy.

Pre- requisites include:

- *Current CPR/Health Care Provider Card (courses are available for registrants of this course at a discount rate)*
- *18 years of age*
- *High school graduate or GED diploma*
